

DRONE & INFRASTRUCTURE MAPPING

ATTENTION COMMUNITY MEMBERS!

We are partnering with CE Strategies and Spruce River Engineering to complete a Fibre-to-the-Home (FTTH) Feasibility Study. The project will evaluate whether our community can successfully implement a broadband internet network.

CE Strategies will be in our community on September 21st - 24th to gather LiDAR data and map out our updated assets. The information collected will support leadership with planning in the community and guide future services that we provide.

If you have any questions or concerns about the data collection happening as part of this project, please feel free to contact:
